Other	Git, Github, Testing, Responsive Web, CI / CD, AJAX, Hosting, DNS, SEO, Google Marketing Platform

PROJECTS

- | | |
|-----------------------|---|
| Bisnar Chase - Gatsby | <ul style="list-style-type: none">- Built production ready, statically generated 7000+ page application with GatsbyJS and TypeScript- Created custom serverless automated build pipeline workflow using CircleCI, Cypress, Jest, and Netlify- Implemented paginated blog with 16 years of Wordpress data by leveraging headless CMS with custom hosting solution that is decoupled from the main application |
| arthurhwang.dev | <ul style="list-style-type: none">- Used NextJS and TypeScript to build server-rendered isomorphic ReactJS application.- Implemented Apollo and GraphQL to programmatically load data fetched from Github API and show loading states- Created custom real-time GitHub commit list component with relevant continuous integration / continuous development status links- Used Formik, Yup and Express to handle form validation and backend form submission logic. |
| Keep Kraze | <ul style="list-style-type: none">- Used NextJS and TypeScript to build server-rendered isomorphic ReactJS application.- Implemented Apollo and GraphQL to programmatically load data fetched from Github API and show loading states- Created custom real-time GitHub commit list component with relevant continuous integration / continuous development status links |
| Angular Login System | <ul style="list-style-type: none">- Used Formik, Yup and Express to handle form validation and backend form submission logic.- Used NextJS and TypeScript to build server-rendered isomorphic ReactJS application.- Implemented Apollo and GraphQL to programmatically load data fetched from Github API and show loading states |
